

**KING INDUSTRIES
JOB DESCRIPTION
Junior Software Developer**

Working Location- Norwalk, CT

King Industries is actively looking to hire a Junior Software Developer responsible for developing business applications that support various operational needs. Ideal candidates should have a Bachelor's degree in computer science/engineering or related technical field, as well as experience using SQL server or other RDBMS systems for development.

Skills Required:

- Methodical developer who is focused and practices due care with a strong attention to detail.
- A go-getter who can balance their need for flawless execution with the need to meet project deadlines.
- Team player who enjoys working with others to design and implement robust solutions for challenging real-world problems.
- Passionate problem solver who listens carefully and enjoys sharing their ideas with others.
- Critical thinker who thrives when working with a variety of programming languages across multiple systems.
- Ingenious designer whose understanding of data engineering fundamentals enables them to conceptualize manual processes, generate logical workflows and create systems to reduce human dependency.
- A supporter of and advocate for diversity, equity, and inclusion

Education and Experience Requirements:

- Bachelor's degree in technical field, computer science/engineering
- Exposure to MS SQL Server, BI Platforms like MS Power BI, Nectari, Tableau, Crystal Reports.
- Knowledge of web development platforms like ASP.NET, SharePoint, MVC, Blazor, etc.
- Understanding of object-oriented programming – classes, methods, inheritance, method overriding, etc.
- Experience developing web-based business-oriented applications. Knowledge of supply chain operations a huge plus.
- Experience using SQL Server or other RDBMS systems for development.
- Knowledge of designing/building/deploying custom web applications
- Understanding of Microsoft environments, Power Shell, and AD – must be able to navigate Windows operating systems.
- Excellent written and verbal communication with both technical and non-technical audiences
- Must have a good balance of resourcefulness - If you do not know how to do something new, figure it out, but if you are stuck, do not spend too much time on it before asking for help.

Duties and Responsibilities:

- Develop web-based applications in a team setting
- Collaborate with users, data consumers and BI analysts to understand data models and application workflow requirements.
- Work with senior developers to complete existing projects as well as independent projects
- Participate in planning and brainstorming sessions
- Design and implement production quality solutions

To apply, please submit your cover letter and resume to vcrichardson@kingindustries.com.
