NA-LUBE EP-5415 is a unique low odor, light colored sulfur carrier based on olefin/fatty oil chemistry. NA-LUBE EP-5415 provides outstanding thermal and hydrolytic stability when compared to conventional low odor, light color sulfur carriers. Because of its novel chemistry NA-LUBE EP-5415 is well suited for machining non-ferrous metals. NA-LUBE EP-5415 provides excellent extreme pressure and antiwear properties when used in combination with appropriate antiwear additives in mineral oils and greases. NA-LUBE EP-5415 is highly suitable for heavy duty drilling and cutting operations. NA-LUBE EP-5415's unique chemistry gives it outstanding solubility in naphthenic, Group I and II base oils. When used in combination with metal-containing or ashless phosphorus-type antiwear and lubricity additives,

**NA-LUBE EP-5415** is an outstanding alternative to chlorinated paraffins in metalworking fluids.
