DISPARLON SPX-46
(Defoaming agent for coatings and inks)

DISPARLON SPX-46 is a silicone defoamer for ambient cure coatings and printing inks.

- **ADVANTAGES**
- Strong defoaming property.
- Effective in a wide range of coating and ink systems.
- No influence on coating clarity.
- Can be used with thixotropic agents.
- Aromatic-free.

- **APPLICATIONS**
DISPARLON SPX-46 can be used in various ambient cure systems. SPX-46 is especially suitable for epoxy coatings, urethane coatings, unsaturated polyester coatings and printing inks.

- **INCORPORATION**
  Additive level : 0.2 - 1.0% by weight on total formulation.
  Method : Post-addition is recommended.

- **TYPICAL PROPERTIES**

<table>
<thead>
<tr>
<th>Appearance</th>
<th>Clear to light yellow liquid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active component</td>
<td>2%</td>
