**APPLICATIONS:**

- Metalworking Fluids: 4.0% - 10.0%
- Water Miscible Metalworking Concentrates: 5.0% - 20.0%
- Industrial Gear Oils: 1.0% - 1.2%
- Slideway Oils: 1.0% - 5.0%

NA-LUBE EP-5216 is a low odor, light colored, sulfur carrier based on fatty acid ester chemistry. The unique chemistry gives it excellent solubility in severely hydrotreated mineral oils, polyalphaolefins and ester basestocks for industrial lubricants and neat metalworking fluids. When used in combination with appropriate metal-containing or ashless phosphorus-containing antiwear or lubricity additives, **NA-LUBE EP-5216** provides excellent extreme pressure properties and offers an alternative to chlorinated paraffins in neat metalworking fluids, especially for heavy duty drilling and cutting.

**ADVANTAGES:**

- Good extreme pressure properties
- Light color, low odor
- Easy handling, low viscosity
- Excellent solubility in Group I, II and III oils
