NACORR 1389 MS is a liquid corrosion inhibitor based on the calcium salts of organic acids supplied in Mineral Spirits. Recommended for use in 2K urethane primers and direct to metal coatings.

**ADVANTAGES:**
- Improves corrosion resistance as it passivates the metal
- Synergistic results are obtained in combination with anti-corrosive pigments
- Improves water resistance by providing a barrier effect and reducing water permeation of the coating
- Easily incorporated into most paint systems

**TYPICAL PROPERTIES:**
- **Appearance:** Clear brown viscous liquid
- **% Active:** 45
- **% Calcium:** 2.2
- **Volatile:** Mineral spirits
- **Weight per gallon @ 25°C:** 7.6

**APPLICATIONS:**
- Solventborne air dry and thermoset coatings
- 2K urethane primers, general industrial and maintenance coatings

**TYPICAL USAGE LEVELS:**
- 1.0 to 2.0% on formulation depending on application requirements

**INCORPORATION:**
- Can be added to a mill base or post-added with good shear

**SHELF LIFE:**
- 24 months from the date of manufacture, when stored at ambient conditions in the original container.

**HANDLING & STORAGE:**
- Safe handling of this product should include the use of safety glasses and gloves.
- Avoid breathing vapors - use with adequate ventilation. Keep product away from sunlight and excessive heat. Refer to Safety Data Sheet for detailed information.

**REGULATORY:**
- Please see section 15 of the Safety Data Sheet.
