**Name**
Deogrip Micro A 2020

**Description**
matting and softtouch agent

**Composition**
radically cross-linked modified castor oil dispersed in water

**Appearance**
white dispersion

**Analytical Values**

**Supply Form**
25 kg in PE drum

**Storage Stability**
In originally sealed package min. 12 months in cool and dry places

**Classification and Labelling**
For detailed information, please refer to our Material Safety Data Sheet.

**Behaviour and Effects**
Deogrip Micro A 2020 is matting, softtouch and texturing additive for water-based paints and varnishes.
Further advantages of Deogrip Micro A 2020 are easy dispersion, shear stability and a more flexible film. Deogrip Micro A 2020 is widely compatible with commonly used binder systems. The hydrophobic properties of Deogrip Micro A 2020 also can help to reduce the water absorption.
General pH-value of Deogrip Micro A 2020 is around 7. In systems with pH < 6 a thickening of Deogrip Micro A 2020 is observed. This has no effect on the quality of the product. The effect is also completely reversible by addition of an aminic agent (neutralizer).
Depending on application typical dosage is in the range of 3 - 10 % (solid content).
