KING INDUSTRIES

JOB DESCRIPTION
PIPEFITTER APPRENTICE

Location- Norwalk, CT

King Industries, Inc. is excited to offer an opportunity for a motivated individual to join our Maintenance Department as a **Pipefitter Apprentice**. This position is designed for someone interested in developing a career in the pipefitting trade through hands-on training and mentorship.

In this role, you will work alongside experienced pipefitters, learning how to assist with the installation, repair, and maintenance of steam, air, water, and chemical piping systems throughout the King Industries plant.

As a Pipefitter Apprentice at King Industries, you will be an integral member of our Maintenance Department, which currently includes a skilled team of six pipefitters who will provide guidance and on-the-job training.

1. Skills Required:
   - Basic arithmetic skills (addition, subtraction, multiplication, and measurements).
   - Ability to read, understand, and follow written instructions.
   - Mechanical aptitude and willingness to learn pipefitting techniques and maintenance practices.
   - Ability to safely use hand and power tools.
   - Strong work ethic, dependability, and willingness to take direction from experienced team members.
   - Ability to work overtime and weekends (including at least two Maintenance Saturdays per month).

2. Education and Experience Requirements:
   - High school diploma or equivalent required.
   - Trade school coursework, vocational training, or technical education is preferred but not required.
   - Previous experience in construction, maintenance, manufacturing, plumbing, mechanical work, or a related field is a plus.
   - Desire to learn a skilled trade and develop technical abilities through hands-on training.

3. Duties and Responsibilities:
   - Assist experienced pipefitters with the installation, repair, and maintenance of steam, air, water, and chemical piping systems throughout the plant.
   - Learn to read and interpret blueprints, diagrams, and work instructions.
   - Assist with troubleshooting and maintaining piping systems and related equipment.
   - Transport materials, tools, and equipment to work locations.
   - Assist with moving and installing equipment at various elevations.
   - Support preventive maintenance activities on piping and process equipment.
   - Maintain a clean, organized, and safe work area.
   - Follow established safety procedures and wear required personal protective equipment (PPE).
   - Collaborate with maintenance team members to complete projects efficiently and safely.
   - Participate in training opportunities to develop pipefitting knowledge and skills.
   - Adhere to company safety programs and maintain a safe working environment.

- Participate in company-wide efforts to uphold quality, occupational health & safety, and environmental (QHSE) management systems in alignment with ISO 9001, ISO 45001, and ISO 14001 standards.
- Maintain awareness of how deviations from established controls and criteria could impact the QHSE Management Systems.
